Ikorodu Lagos State

Skills

- React
- Nest.js
- Tailwind
- Figma
- CSS
- Bootstrap
- Microservices architecture
- Javascript
- Typescript
- Next.js
- Postgres
- Python
- Express.js
- Node.js
- Full stack
- API integration
- Database management
- Application design
- User authentication
- Project management
- Team collaboration
- Responsive web design
- Problem solving
- Scrum framework
- JavaScript coding
- UI/UX principles
- Web technologies
- Continuous deployment
- Requirements gathering
- HTML expertise
- React knowledge
- API development
- JavaScript proficiency
- Coding
- HTML5 skills
- CSS proficiency
- CSS skills
- HTML proficiency
- JavaScript development
- Server-side rendering
- Git version control
- Team collaboration
- Configuration management

Chukwudi Praise

Summary

Focused Full Stack Developer experienced in creating user-centric web applications using React, Next.js, and Node.js. Demonstrated success in API integration and cross-functional collaboration, delivering high-performance solutions through scalable design and clean code. Committed to enhancing customer satisfaction and driving internal improvements with innovative strategies.

Experience

Full Stack Developer - 3 Projects - Full Stack Developer

09/2025 - Current

- Developed and maintained responsive web applications using modern frontend frameworks (e.g., React, Next.js) and backend technologies.
- Integrated RESTful and GraphQL APIs, ensuring efficient data flow between client and server.
- Designed and managed databases (SQL or NoSQL) to optimize application performance and scalability.
- Collaborated with cross-functional teams (designers, product managers, and QA engineers) to deliver user-centered features on time.
- Implemented authentication and authorization protocols, enhancing user data security and system reliability.
- Developed responsive and interactive user interfaces using modern frameworks such as React, Next.js, and Tailwind CSS.
- Translated UI/UX designs and wireframes into high-quality, reusable, and scalable code.
- Optimized website performance through lazy loading, code splitting, and image optimization, resulting in faster load times and improved user experience.
- Integrated APIs and backend services to display dynamic data and ensure smooth user experiences.
- Implemented responsive web design principles to ensure applications are mobile-friendly across various devices.
- Created and maintained documentation for applications, facilitating easier future maintenance and development.

Naija Space - Project Developer

09/2023 - 09/2025

- This project was developed as part of a group assignment aimed at creating a web-based platform to enhance communication and collaboration among students within the university community.
- Developed the frontend of the platform using React.js and Tailwind CSS, and built the backend with Node.js and MongoDB for efficient data storage and smooth performance.

Education

Expected in 05/2027

B.Sc.:

Cyber Security

Nnamdi Azikiwe University

Awka, Anambra, Nigeria

- In Progress
- Coursework includes Network Security, Ethical Hacking, Web Application Security, and Data Protection. Developing strong technical and analytical skills through hands-on projects and real-world application of cybersecurity principles. Actively expanding expertise in web development and full stack engineering alongside core security studies.
- GPA: 3.50 / 5.00

Websites, Portfolios, Profiles

- <https://ry-two.vercel.app/>

- The system allows users to register, share study materials, post announcements, and interact in real time.
- The project also included basic security features, such as password hashing and user authentication, to protect user data and prevent unauthorized access.
- Managed project documentation and maintained accurate records.
- Monitored project milestones and ensured adherence to timelines.
- Identified project risks and implemented mitigation strategies.
- Implemented process improvements to enhance project efficiency.
- Assisted in budget management and resource allocation for projects.

Projects

Naija Space, 09/01/23, 09/01/25, This project was developed as part of a group assignment aimed at creating a web-based platform to enhance communication and collaboration among students within the university community. The system allows users to register, share study materials, post announcements, and interact in real time. The frontend of the platform was developed using React.js and Tailwind CSS, while the backend was built with Node.js and MongoDB, ensuring efficient data storage and smooth performance. The project also included basic security features, such as password hashing and user authentication, to protect user data and prevent unauthorized access.
